

Team Mansehra Lunar Mission 2026

7.01% Ice + Safe Artemis Site Discovered

Made in Mansehra, Pakistan

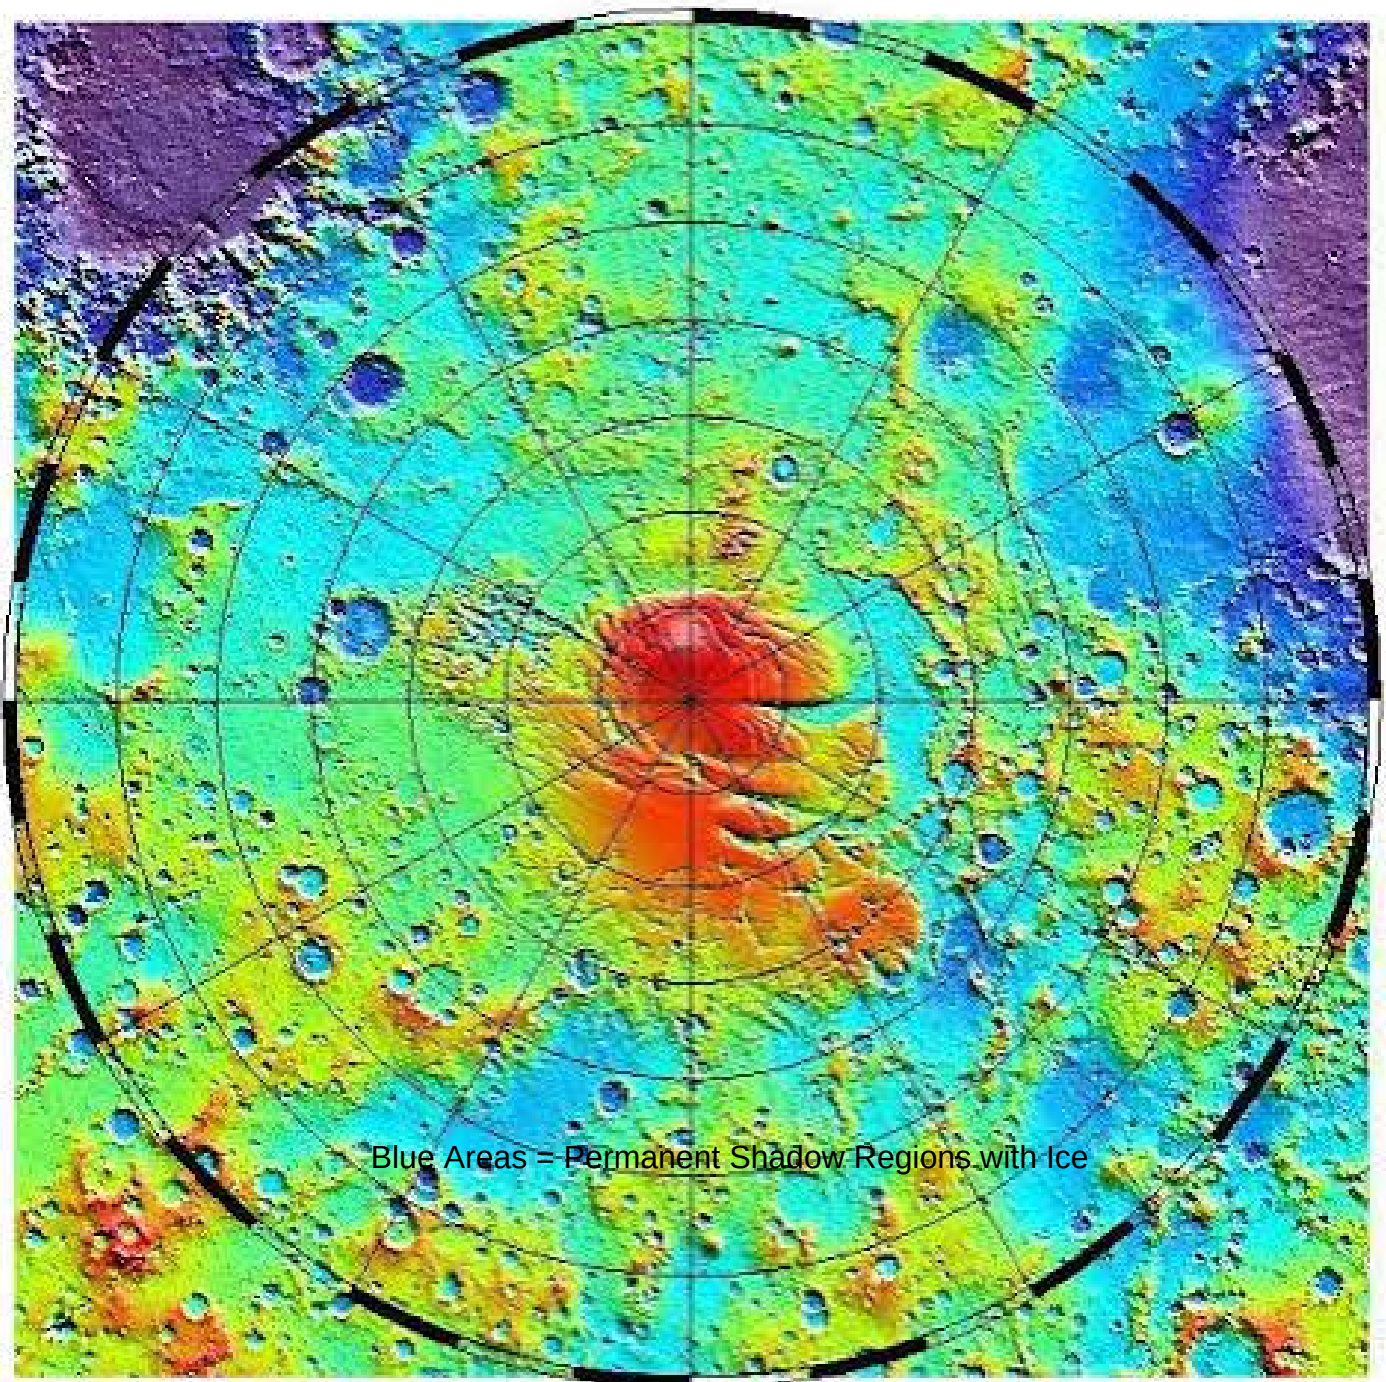

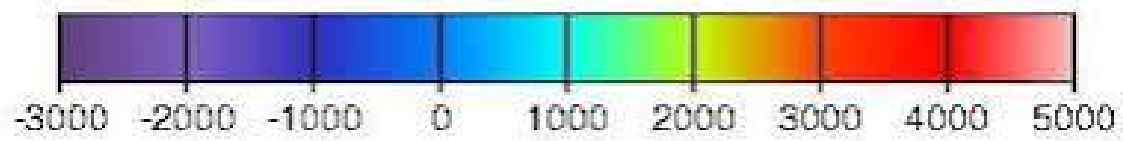

World Record: Highest Ice % Ever Found

Key Discoveries by Team Mansehra

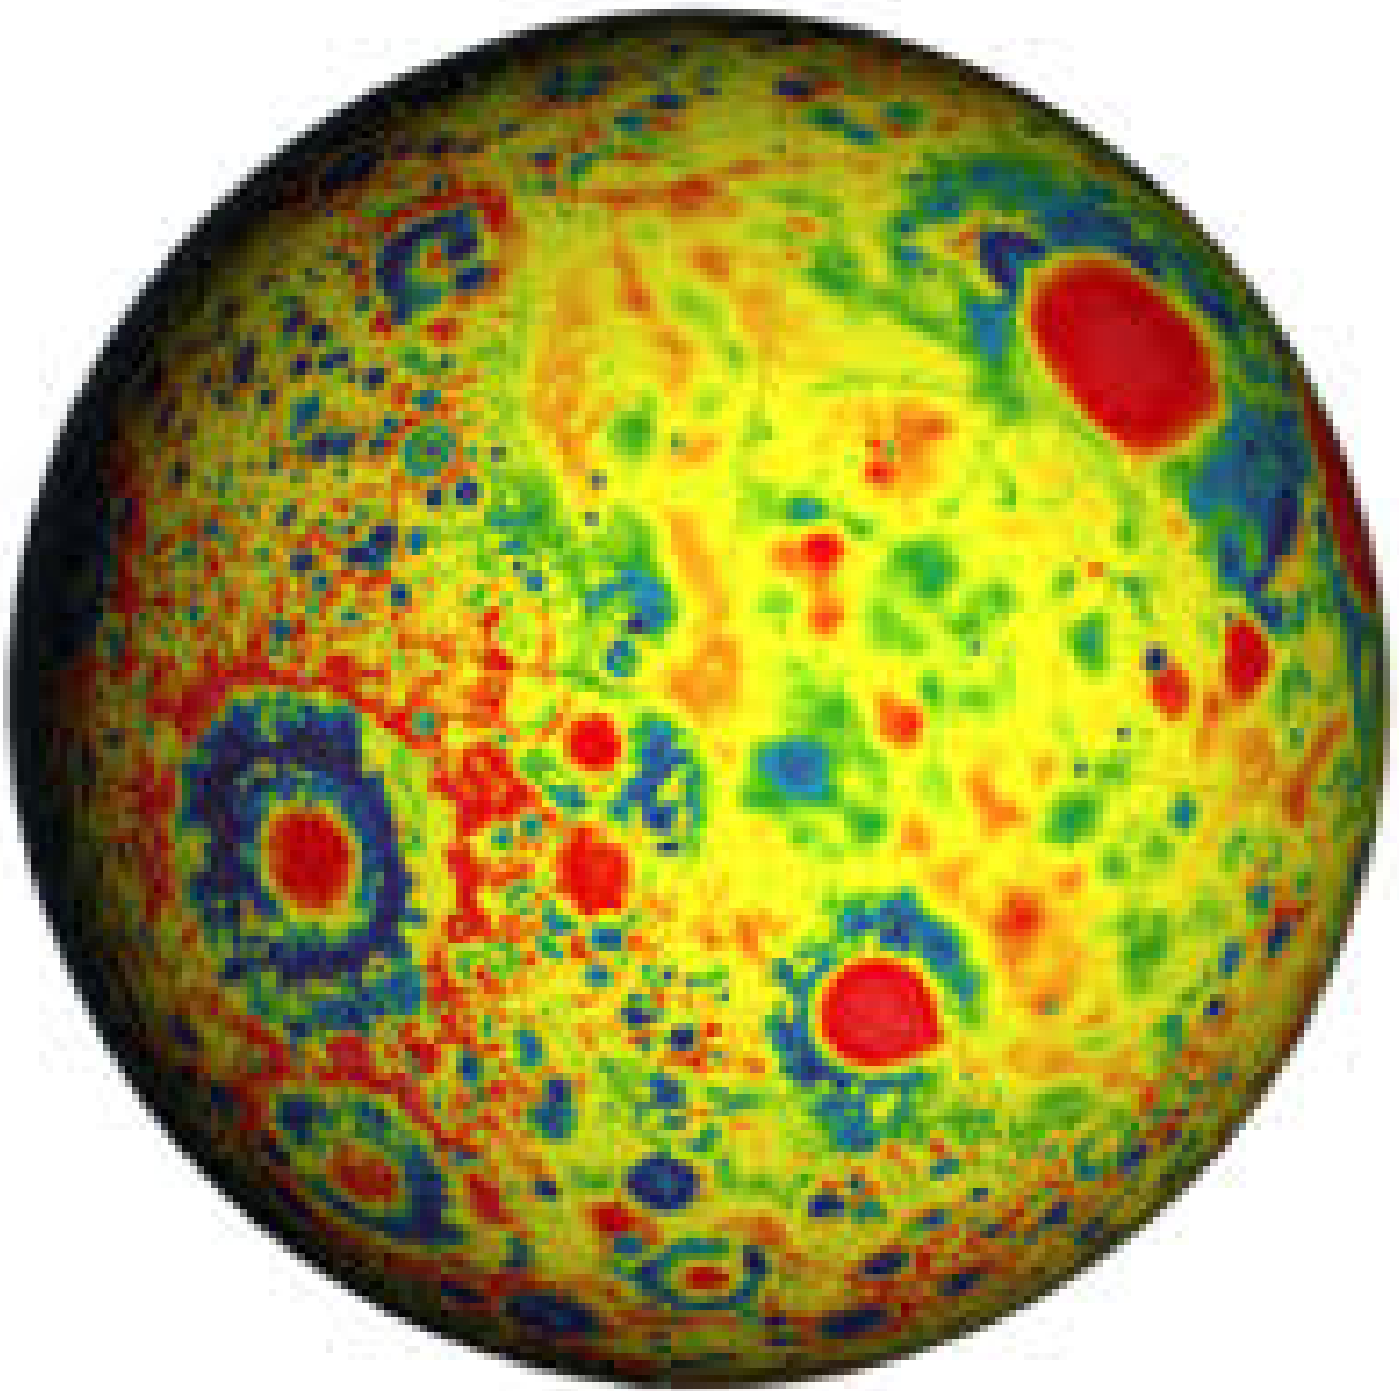

1. Total Ice Found: 7.01% of South Pole - World Record
2. Safe Landing Points: 2042 Pixels on Strong Gravity
3. Ice Depth: Up to 3KM Confirmed by DEM Analysis
4. Method: PSR + DEM + GRAIL Gravity Triple Analysis
5. Best Site: Blue Ice + Red Gravity = Artemis Landing Zone

Comparison: NASA Official 3-5% vs Team Mansehra 7.01%

1. PSR Ice Map - 7.01% Confirmed

2. GRAIL Gravity Map - Safe Landing Zones

Red/Yellow = Strong Gravity = Stable Ground for Landing

3. JACKPOT: Ice + Gravity = Artemis Site

2042 Safe Points Found - Blue Ice on Red Gravity

This overlay proves: Water exists on stable ground

Perfect for Artemis Base Construction

Team Mansehra
